

## Skydive Wanaka – New Kane Road PLA Information Pack for Paragliders

Skydive Wanaka, located at Wanaka Airport has established a new Parachute Landing Area (PLA) and Skydive Operation Zone (SOZ).

It's located 3nm north-east of the Wanaka airport, south-east of Hawea Flat – see map below. This is effective immediately and is active daily.

The map below shows the Skydive Operational Zone and Parachute Landing Area as indicated in blue. Parachutists in free fall and under canopy will be active in this area. This area should be treated as a danger area. Notes on the map are as follows =

- 1. The northern boundary runs under the extension of Newcastle Road.
- 2. The eastern boundary is set in from the rising terrain to enable paragliders access to land in the paddocks.
- 3. Any paraglider can contact our drop plane to coordinate crossings near our northern boundary. Our pilots are happy to work with you to help you out whenever we can.
- 4. Contact the Skydive Drop Plane on frequency 120.10.
