Live tracking

The organizer will provide a Live Tracking Device (LTD: device for real time tracking) to all pilots. It must be used in each task to increase safety, achieve significant media impact and improve the retrieve service. The devices will be also used as primary source for scoring. The organization will be responsible for charging all LTDs and delivering them to the pilots each flying day. Pilots must ensure to have their own LTD before take-off: failing to pick it up or returning it to the organization before the beginning of the task will be interpreted as pilot's refusal to accept the task and the pilots will be scored as DNF. The pilot that for whatever reason won't fly the assigned task has to return the LTD to the organization directly at the take-off.

After receiving the LTD, pilots will be responsible for its proper use and maintenance, making sure that it is turned on during the flight and returning it to the organization at the end of each task (report back). Instructions on the use of the devices will be given during the briefing. In case of loss or damage of the LTD, pilots will be requested to pay the full compensation of damages, amounting to 300 €.

Complaints and protests

Complaints will be dealt with as per FAI Sporting Code, Section 7 and its sub-categories. Any complaints must be written in English and submitted to the Meet Director before 9:00 a.m. On the day following the publication of the provisional results or within 30 minutes from the publication of the final general results on the last day. A deposit of 50 € is requested to present the complaint. If it is rejected, the deposit will not be returned.

Cancellation and refund

Paid entry fees will not be returned for any other claim. In case of no valid tasks, the organization will return part of the entry fee to each confirmed pilot in the group (minimum amount 50 € - maximum amount 200 €, depending on the expenses afforded by the organizer).
